

The Listel Hotel Vancouver Meetings & Events

bullfrogpowered™

All of us at The Listel Hotel recognize the increased importance that event and meeting planners have in positioning their meetings as “green” and in promoting reduced environmental impact. As part of our eco-initiative, Environment Matters, we continue to explore new opportunities to help event and meeting planners green their events. Through this initiative, we are proud to support renewable electricity with Bullfrog Power.

All of The Listel Hotel's meeting rooms are now bullfrogpowered with 100% BC-made wind power. Together, ensuring that all meetings, conferences and events are reducing their environmental footprint.

Choosing Bullfrog Power means taking a stand for low-impact renewable electricity, creating further demand for wind power, reducing the impact on the environment and helping to create a healthier environment for today and tomorrow. Leading environmental groups including WWF-Canada and the David Suzuki Foundation advocate choosing clean, renewable power as a meaningful action individuals and organizations can take to help address the global issue of climate change and support the development of renewable energy.

When hosting a bullfrogpowered event at The Listel Hotel your event will:

- Have a reduced environmental footprint
- Help create a healthier environment for families, communities and future generations
- Strengthen the event's association with a clean environment and healthy lifestyle

How does it work?

It's very simple – Bullfrog calculates the amount of electricity used by the meeting and function space at The Listel Hotel Vancouver and then ensures that an equivalent amount of low-impact renewable power from EcoLogoM-certified wind is injected back on to the electricity system. It's good to know that all events held at The Listel Hotel Vancouver are automatically bullfrogpowered.
